

STOPware Visitor Management Systems

Total Control For Lobby Security

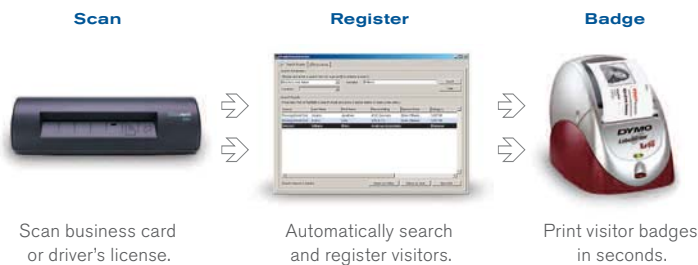

In today's world, information and control go hand-in-hand. That's why security directors, facilities managers, and IT managers now share a new imperative: *make buildings more secure than ever.*

This is a complicated job. It requires everything from updated safety procedures to video surveillance. Increasingly, it also means replacing outdated paper-based lobby registration systems with fully integrated security software and badging solutions.

STOPware, the visitor management pioneer, continues to lead lobby security with its award-winning PassagePoint™ software. PassagePoint gives you *total control* in verifying, screening, and badging visitors—whether for a single lobby or an entire campus. It's the most comprehensive solution available for government agencies, healthcare organizations, multi-tenant buildings, and companies of all sizes. No other software product offers such functionality, speed, ease-of-use, and scalability.

PassagePoint v4.5 with Rapid Registration: The Ultimate in Speed

STOPware products are extremely simple to use. With PassagePoint v4.5, they also provide the ultimate in speed. Simply scan in a driver's license or business card and a visitor's badge is printed in seconds. A complete system with scanner, badging hardware, and camera installs in just hours.

Improves Security and Corporate Image

- Creates a visible front line of defense for building and staff
- Allows you to screen visitors against historical directories
- Helps stop unwanted visitors through Look-Out/Watch lists
- Lets you quickly produce professional-looking badges

Streamlines Management and Adherence to Process Requirements

- Built-in application server to centrally maintain and update remote locations
- Integrates with access control systems*
- Integrates NDA & Safety Agreements, HIPAA Requirements, and Export Control Requirements

Speeds Registration by 20-25% While Reducing Costs

- Allows sign in of visitors and prints badges with just one click
- Lets employees pre-register visitors to minimize wait time
- Supplements or replaces lobby staff with interactive kiosk
- Eliminates the need for paper forms and storage

* May require add-on license

Simple, Quick, and Scalable

Helping companies embrace paperless environments is the goal of Adobe Systems, the world's second largest software company. When Adobe itself needed to install a paperless visitor badging system, they turned to STOPware, and its industry-leading visitor management system, PassagePoint. "My main concerns were ease-of-use, security, and cost," said Mark Domnauer, Security Operations Manager for Adobe. "PassagePoint proved to be the best solution we tested. They had everything up and running in three or four hours." Adobe eventually extended PassagePoint to garages, enabling guards to pre-register guests and making lobby registration that much easier. "If they're pre-registered, we just click a few times and they're in," adds Mark. "No other system or company offers this capability, let alone the service."

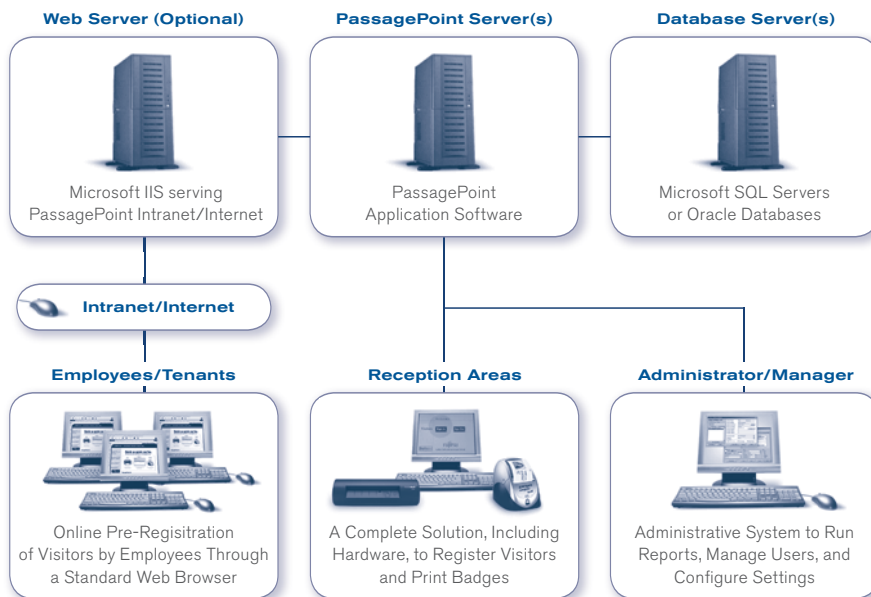

STOPware Products and Additional Modules

Products: PassagePoint Professional v4.5, PassagePoint Enterprise v4.5

Modules: MyVisitors.Net, Photo Capture, Access Control Integration, Directory Linking, Handheld Delivery Tracking, Web Pre-Registration

PassagePoint Enterprise v4.5: Scalable To Fit Your Needs

PassagePoint Enterprise v4.5 is highly scalable and flexible. It's designed to work on one server or across multiple servers, in a multi-tiered architecture, for maximum performance and redundancy.

Total Control for Lobby Security

With PassagePoint Professional v4.5 and Enterprise v4.5, STOPware continues to raise the bar in visitor management. No other products give you such total control in verifying, screening, and badging visitors—and with such ease, speed and scalability.
