

Special Conversion Offer

for IVIS® Plus Customers...

expressionsID™

KEY FEATURES:

- **Record Navigator**
Folder-based management of cardholder records.
- **Drag and Drop Design for both screen and card**
Customize your screens and cards and save them as new designs. Or, rely on our default database and stylish design templates.
- **LDAP Sign-on and connection**
Authenticate users through an existing network login structure.
- **Tabbed Pages for organizing record data**
Screen design options include tabbed pages to enable you to better organize record data.
- **Screen Logic capabilities**
Permit individual record data to trigger the display of images or graphics on the screen, providing instant visual alerts.
- **Intelli-Chrome (floating head) technology**
Customize the background of your photo with an image, such as a logo, to add another level of security or use it to color code by department.
- **Security Profiles**
Simple to define for groups of users, security profiles enable you to specify the time period for which individual users have software rights.
- **Versatile design options**
User-definable badge designs, screen designs, and database fields provide limitless customization tools.

Save up to 60%

the face of security

expressions ID™

The *fresh* look and feel you want.

expressionsID™, our new innovative digital ID badge software, provides the power and versatility to create security ID cards with a distinctive look. The process is more imaginative and enjoyable than ever with eye-popping screen colors and composition that help you create inspired card designs.

The *security* you need.

As security ID specialists, we designed **expressionsID** with features to enhance the security of your ID cards:

- **IDentiGuard™**, our exclusive security application—for protecting your cards from alteration or replication
- **Oversized cards and credentials**—for easier identification
- **Multiple card reader technologies**—for additional security
- **Interface options**—to incorporate contactless smart card technology and biometrics into your badge solution
