IDENTIFY. ACCESS. SECURE.

## Why Customers Love WhosOnLocation

*WhosOnLocation services customers around the world and is the emerging leader in online people presence management software, providing corporate, health, government, manufacturing, industrial, construction, high security, and education organizations with real-time visibility of who is authorized access to customers' sites, who is coming onsite, who is actually onsite, and who was onsite in a way that's simple, smart and secure. Let us share some of the key reasons why customers are choosing WhosOnLocation.*

### 1. Rapid Setup and Deployment

You can set up your account in a few minutes and deploy to your team the same day. WhosOnLocation has many tools and customizations that can help any company provide a world class Visitor Management service. While it is very powerful and robust, it is easy to implement and learn.

### 2. It's Easy to Use

WhosOnLocation is easy to try, buy, set up, and use, so you won't waste precious time getting your team up to speed.

### 3. It's Flexible

WhosOnLocation scales with your business and supports single, multi-location, and multi-country deployments, giving you a complete picture of your visitor traffic anywhere in the world.

### 4. It's Efficient

WhosOnLocation is a one-stop-shop for Visitor Management. Whether it's visitor pre-registration, visitor pass issuance, visitor self-registration, reception support, or email and SMS (text) visitor arrival notifications, any visitor policy requirement can be deployed in minutes to any location, anywhere in the world.

### 5. Innovation

Our agile development team innovates at a rapid pace, continuously improving the product and quickly responding to

customer needs. We have a strong vision of the future and an aggressive roadmap to get us there.

### 6. Built for Scale

Our proven track record of scalability and 99.9% uptime means you'll never outgrow WhosOnLocation. Companies that have started off with a single location have quickly extended their WhosOnLocation account across multiple locations, ensuring all visitors, suppliers, and customers share the same visitor experience.

### 7. Community

Interact with WhosOnLocation, our partners, and other customers through our support forums, blog, and events, where you will find information and insights to help improve the security and safety of your organizations' people.

### 8. Business Insights

Users can access reports in seconds, view their reports on screen, print, or download as a CSV file from any internet browser. Identify frequency of visitor traffic, the amount of time people spend onsite, and who is onsite in real-time, a great way to support evacuation processes.

### 9. No Installation or IT Maintenance Required

There's no software to download. Users access WhosOnLocation anywhere, anytime, from their internet browser. Monitoring is done 24x7x365 to make sure you have the highest possible uptime rate to access your account. Upgrades are added to your account automatically so that you see them when you login, rather than having to deal with software updates on every machine. WhosOnLocation has the highest level of internet security possible with firewalls, encrypted transmissions, daily data backup, and frequent patches and testing.

### 10. Support and Training

No matter what the question may be, our dedicated support team is here to help with solutions and answers. Users have access, directly from the application, to online help, guides and training videos. There is also monitored helpdesk ticket management and real humans who will talk to you when you need the help.
